REASONS FOR ALLOWANCE

Allowable Subject Matter

Claims 1, 3 and 5 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, prior art fails to teach or reasonably suggest, either singly or in combination, a photoelectric sensor for detecting the presence/absence of an object in a plurality of detection areas comprising a plurality of different values of driving current supplied to the light-emitting device, in addition to the other limitations of the claim.

With respect to claim 5, prior art fails to teach or reasonably suggest, either singly or in combination, a photoelectric sensor for detecting the presence/absence of an object in a detection area comprising a plurality of reference values different from one another that are repeatedly changed in a predetermined pattern and are compared with the output level and the results of the comparison are outputted in sequence, in addition to the other limitations of the claim.

Claim 3 is allowable due to its dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

O'Conner et al. (US 6,693,273) discloses in Fig. 2B, a system for monitoring various regions to determine the presence of an object comprising a plurality of light-emitting areas of a light emitting device and a single light-receiving area of a light-receiving device that are overlapped with each other. O'Conner et al. further discloses comparing the output level of the light-receiving device to at least one reference value to determine the presence or absence of an object.
